**The 3<sup>rd</sup> China-US International Workshop on Wetland Science  
& The 2<sup>nd</sup> Summit Forum on Coastal Wetlands (2<sup>nd</sup> round Announcement)**

Wetlands are known as one of the most productive ecosystems of the earth, and they are playing vital roles in maintaining environmental health, economic development, and biodiversity. However, wetland ecosystems are facing unprecedented challenges in the context of global change and increasing anthropogenic activities. Currently, wetland ecosystems have been in a seriously degraded status and have become one of the most vulnerable ecosystems in the world. China and the United States are representatives of developed and developing countries, respectively, and thus it is of important significance to conduct collaborative research on wetlands between the two countries. In-depth academic interactions will effectively promote cooperation between the two countries in the research field of wetlands. **“The 3<sup>rd</sup> China-US International Workshop on Wetland Science & The 2<sup>nd</sup> Summit Forum on Coastal Wetlands” will be held on September 17-18, 2016 in Xiamen, China.** All experts and researchers on wetlands from China and the United States are welcome!

**Theme:** Wetland ecosystems and global change – from science to management

**Topics**

- Ecosystem evolution, services, and maintenance mechanisms of coastal wetlands
- Blue carbon of coastal wetlands and global change
- Ecosystem evolution of marine-

Fudan University,  
Xiamen University,  
Institute of Urban Environment, CAS

**Call for Abstract:**

The Workshop Secretariat invites abstract submissions. The abstract should have the following structure: Title, authors' names and institutional affiliations, background and objectives, methods, findings and conclusion. Mark the name of the corresponding author (\*). An abstract should not exceed an A4 page using Times New Roman 12 and Line Spacing 1.25.

**Oral presentations**

Plenary talks are 30 minutes each including 5 minutes Q & A.

Other oral presentations are limited to 15 minutes including 2 minutes Q & A.

**Poster presentations**

Posters should not exceed 120 cm (height) and 90 cm (width), and should be in portrait orientation. We recommend all posters be collected in the registry.

**Important dates:**

- Aug. 25, 2016 Registration and abstract submission closed, hotel booking deadline
- Aug. 31, 2016 Graduate students notified of acceptance
- Sep. 10, 2016 3<sup>rd</sup> round Announcement & E-Program
- Sep. 16, 2016 Symposium commences

Please register on website and submit your abstract and related info. before **Aug. 25**
